INTRODUCTION

Mr Mint is the brainchild of extraordinary people with a vision to extend the benefits of mining to individuals. A vision born out of the willingness to create growth opportunities for millions who are waiting to participate in this fast-growing mining ecosystem, but have been held back because of the costs involved, technical support and maintenance. With Mr Mint, those who aspire to be a part of the growing mining world can do so with as little as \$100.

With a global mindset and reach, Mr Mint will lead the universal crypto miner's community. The project will develop crypto-mining farms with a hybrid state-of-the-art technology to overcome the significant problem faced by European and Asian HPC facilities.

Mr Mint's miner's community will use less electric energy compared to European and Asian infrastructure that mine cryptocurrencies across the globe.

OUR PURPOSE

The mining of cryptocurrencies, especially Bitcoin is a long-term play.

The mother of all coins teaches our community that no matter how many technological explosions we witness in the crypto world, Bitcoin will remain almost constant. The mining of Bitcoin comes with great rewards, but so does the mining of other cryptocurrencies. Bitcoin's halving every 4 years also indicates an upward price trend. Mining is the aspiration that keeps the community together, and Bitcoin tends to influence the market trends – yet has not experienced a long-term collapse.

This motivates Mr Mint to undertake more mining projects for the community, making them believe in an open, shared community that accelerates collective progress.

VISION

To empower every individual and every organization in the blockchain ecosystem to achieve more through a bright and progressive mining framework. To provide value to the community through content and experiences like NFTs that aid the development of the Metaverse.

MISSION

Our mission is to extend the rewards of mining to a global community of individuals driven by the potential of the bright mining future. We aim to make this possible through our state-of-the-art infrastructure capabilities by building an open and shared community.

Our ambition is to reach a target of mining 5 Bitcoin daily in a span of one year. Imagine a time when this aspiration is achieved, and it supports MNTs liquidity and market cap.

As phases progress, we aim to create a marketplace that integrates NFTs, the Metaverse, thereby developing a cross-chain ecosystem.
